

Project Synopsis

A Synopsis is a brief outline or general view, of a subject or written work; an abstract, or a summary. The contents of the Synopsis should be brief (NOT MORE THAN 20-25 A4 sized paper) as it is sufficient enough to explain the objective and implementation of the project that the candidate is going to take up. The write-up must adhere to the guidelines and should include the following:

1. Title of the Project

This should be explicitly mentioned at the beginning of the Synopsis. Since the topic itself gives a peep into the project to be taken up, you are advised to be prudent in naming the project. This is the overall impression of the future work, the topic should corroborate the work.

2. Introduction and Objectives of the Project

Introduce the background and context of the project.

Explain the significance and relevance of the project in the current scenario.

Briefly describe the problem or opportunity that the project aims to address.

Clearly state the main objectives of the project.

Define the specific goals and outcomes that the project is expected to achieve.

3. Project category and Methodology

(RDBMS/OOPS/Networking/Multimedia/Artificial Intelligence/Expert Systems etc.).

Describe the approach and methods that will be used to achieve the project objectives.

Discuss the technology stack, tools, and frameworks that will be employed in the development process.

Provide an overview of the development life cycle (e.g., Agile, Waterfall).

4. Tools/ Platform, Hardware, and Software Requirements

The requirement of the resources for designing and developing the proposed system must be given. The resources might be in form of the Tools / Platforms, hardware/software, or data from the industry.

5. System Architecture:

Provide an overview of the system architecture, including components, modules, and their interactions.

Use diagrams or charts to illustrate the architecture.

6. Process description including CFD, DFDs (Level 0/ Level 1) and ER diagram.

The process of the whole software system proposed, to be developed, should be mentioned in brief. This may be supported by CFD, DFDs / Flowcharts to explain the flow of the information, and ER diagram.

7. Scope of the solution (what contribution would the project make?)

The main purpose of the scope definition is to clearly describe the boundaries of your project. The scope statement details the project deliverables and describes the major objectives. A scope statement should also include the list of users using the product, as well as the features of the resulting product. Specify the limitations of the project.

8. Work Plan/Timeline:

*Provide an overview of the project timeline.
Break down the project into key phases and milestones.
Include a Gantt chart.*

9. Expected Outcomes:

*Outline the expected results or deliverables of the project.
Discuss how these outcomes will contribute to the overall objectives.*

10. Ethical Considerations:

*Discuss ethical considerations associated with your project.
Address how you plan to ensure ethical conduct throughout the project.*

11. Conclusion

The write-up must end with the concluding remarks briefly describing innovations in the approach for implementing the Project, main achievements, and also any other important feature that makes the system stand out from the rest. Emphasize the importance and feasibility of the project.

12. Bibliography/References

The references should be numbered serially in the order of their occurrence in the text and their numbers should be indicated within square brackets e.g. [3].

Books:

Author, A. A. (Year of publication). Title of work: Capital letter also for subtitle. Publisher.

Example:

Cooper, J. A. (2001). The Spirit of C: A beginners guide. PHI.

Journal Articles:

Author, A. A., Author, B. B., & Author, C. C. (Year). Title of the article. Title of Journal, volume number(issue number), page range. DOI or URL

Example:

Johnson, M. L., & Smith, K. D. (2019). The impact of technology on education. Journal of Educational Technology, 15(3), 45-62. <https://doi.org/xxxxxx>

Webpages:

Author, A. A. (Year, Month, Day of publication). Title of the webpage. Website Name. URL

Example:

Maria Diaz (2023, April 21). What is AI? Everything to know about artificial intelligence.

ZDNET.
